

CUSTOM BRIEFING STICKS

Our solid mahogany wood briefing sticks are not only carved and putty primed to get the exact shape, but also painted, airbrushed, and stenciled by hand. Not to mention, we create decals to replicate the smallest details in only 9-10 weeks. The 6 inch long airplane model is attached to a sturdy wooden rod and is a perfect training aid for flight briefing, debriefing, and display.

Here are some examples of our custom designs:

- ✪ *We will replicate the exact markings of any type of airplane, including squadron markings and any tail number.*
- ✪ *Specific model sizes and scales are available.*
- ✪ *Ideal balance and accuracy to teach BFM, formation, or aerobatics.*
- ✪ *Order includes a lifetime warranty against any defects, with our 100% customer satisfaction guarantee.*

PRICING

Single: \$99.95
each

10 or more: \$89.95
each

20 or more: \$79.95
each

30 or more: \$74.95
each

3 EASY STEPS...

1

Submit Your Order

Start the process of creating your own custom wooden aircraft model by ordering online via our secure website, or you can email us to get the ball rolling at info@aviatorgear.com.

2

We Create Your Custom Order Forms

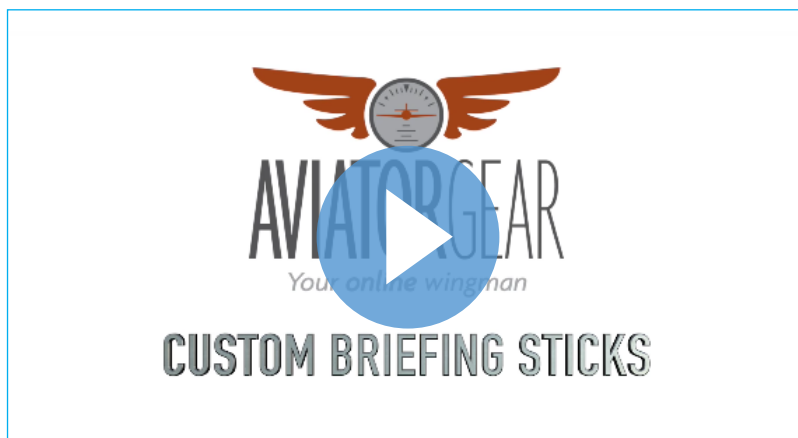

We will email the custom order form to you for your review and approval in 2-3 days. Email us back with your approval or any changes. Once you approve the order form, we will begin production.

3

Production Begins

Your model is hand-carved from solid mahogany wood. Our detailing uses airbrush, stencils, and in-house created decals to replicate the smallest details. Once your model is complete, we will email digital photos for your final approval, prior to shipping.
