## 3 EASY STEPS...

**1**

### **Submit Your Order**

Start the process of creating your own custom wooden aircraft model by ordering online via our secure website, or you can email us to get the ball rolling at [info@aviatorgear.com](mailto:info@aviatorgear.com).

**2**

### **We Create Your Custom Order Forms**

We will email the custom order form to you for your review and approval in 2-3 days. Email us back with your approval or any changes. Once you approve the order form, we will begin production.

**3**

### **Production Begins**

Your model is hand-carved from solid mahogany wood. Our detailing uses airbrush, stencils, and in-house created decals to replicate the smallest details. Once your model is complete, we will email digital photos for your final approval, prior to shipping.

# MODEL ASSEMBLY INSTRUCTIONS

- 1) Please take care in unpacking your model. Pay close attention to the notes written on the cardboard locking panels. Cut the tape carefully and slowly lift each locking panel to remove.
- 2) Once the model is removed from the box, verify the correct inventory with the included packing list. The smaller antennas are often enclosed in an envelope taped to the packing paper.
- 3) Take special care when using scissors or a knife to remove the packing materials. It is very easy to accidentally cut the HF antennas, fending lines, and guide wires. Be sure to carefully inspect all packing materials and save them to repackage your model in the future. We recommend that you save the shipping containers and packing materials. These containers are designed to be reused for storing, moving, or shipping your models during PCS/TAD moves.
- 4) Assemble the base of your model first. The base and neck are attached using the 2 screws included with the base. To attach the base, slowly rock the model back and forth to slide the base pins into the grommets.
- 5) Once the model is on the base, you can assemble the weapons, propellers, and antennas
  - a) When installing propellers, rotor blades, or antennas; it is best to wet them with water. When inserting the tip into the hole, twist and rotate the metal tip, until the part is seated all the way...  
DO NOT PUSH IT WITHOUT TWISTING. Often rotor heads are made of resin, and this could cause them to crack.
  - b) When installing the bombs, missiles, and pods; it is highly recommended to lightly dip the tip of the pins into a very small drop of super glue before inserting into the hole. Although the pins are tight in the holes when leaving the factory, as the wood hardens the holes may loosen.  
Lightly dipping the pin into a very small drop of super glue will allow you

# MODEL ASSEMBLY INSTRUCTIONS

- a) Gloss Finish - Models and stands can be cleaned using a light amount of furniture polish on a soft cloth. Do not spray the furniture polish directly onto the wood product.
- b) Flat Finish - Combat aircraft models, munitions and flat finish propellers can be cleaned by using a can of compressed air, feather duster, or a soft bristled paint brush. You can also use a damp cloth. Please do not use a furniture polish to clean your flat finish products to avoid discoloration on your model, munitions and flat finish propellers.

# GROUP MODEL ORDER PROGRAM

We will work with each person individually to design their model with a custom order form. Each person will receive a custom invoice with payment instructions and we accept credit cards, PayPal, and checks by mail. Full payment is required prior to starting production of the group order, so order form approval or payment delays will delay the entire order.

We will ship the models together from our factory in the Philippines to the squadron's physical address via UPS International. Each model will be packaged and labelled individually. We can ship your model to a separate address anywhere in the CONUS, for an additional \$20.00.

## Regular Model

Website Price: \$279.95 each  
5 or more: \$259.95 each  
10 or more: \$239.95 each  
25 or more: \$219.95 each  
Any other type of aircraft: \$259.95  
Shipping Cost: \$40.00 each  
Clear canopy upgrade: \$100.00 each

## Miniature Model

Website Price: \$179.95 each  
5 or more: \$159.95 each  
10 or more: \$139.95 each  
25 or more: \$119.95 each  
Any other type of aircraft: \$159.95  
Shipping Cost: \$25.00 each  
Clear canopy upgrade: \$60.00 each

Here are the areas each person can customize their own model.

- Any squadron markings. We can even create a hybrid model with one squadron's markings on one side and markings of another squadron on the other side.
- Any tail number and personalized names on both sides of fuselage.
- Your choice of any external ordnance, pods and fuel tanks on our regular size models.
- We will provide a free upgrade to our triangular stand, a savings of an additional \$25.00 each.
- Carved and painted patch or logo on the stand and any two lines of personalized text.
- •The clear canopy upgrade includes a carved out and detailed cockpit showing all interior details.
